## SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence, Machine Learning, and Computer Vision with hands-on experience developing 6+ real-world AI and full-stack projects. Actively maintaining a GitHub portfolio and participating in hackathons. Seeking internship opportunities to apply data-driven problem-solving skills in innovative environments.

## EDUCATION

**Koneru Lakshmaiah University, Telangana, India**  
Bachelor of Technology/ Under-graduation  
(Computer Science Engineering)

Jun.2024 - Present  
GPA: 9.79/10

**Sri Vasishtha Junior College, Telangana, India.**  
Grade 12<sup>th</sup> / Intermediate  
(Mathematics, Physics, Chemistry)

Jun.2022 -April.2024  
GPA: 968/1000

**Jyothi Vidyalaya High School, Telangana, India.**  
Grade 10<sup>th</sup>

Jun. 2021- April.2022  
GPA: 9.5/10

## TECHNICAL SKILLS

|                                   |                                                                                            |
|-----------------------------------|--------------------------------------------------------------------------------------------|
| <b>Programming</b>                | : C, Python, Java, HTML, CSS, JavaScript, PL/SQL                                           |
| <b>Web Technologies</b>           | : React, Node.js, Frontend Development                                                     |
| <b>Databases</b>                  | : MySQL, MongoDB                                                                           |
| <b>ML &amp; AI</b>                | : Machine Learning, Deep Learning, Computer Vision, Audio Signal Processing, Data Analysis |
| <b>Libraries &amp; Frameworks</b> | : OpenCV, TensorFlow, Keras, MediaPipe, Pandas, NumPy, Scikit-learn                        |
| <b>Tools &amp; Platforms</b>      | : Git, GitHub, Linux, Visual Studio Code                                                   |
| <b>Soft Skills</b>                | : Problem Solving, Analytical Thinking, Communication, Time Management                     |

## ACADEMIC PROJECTS

### Emotion-Aware Voice Analysis with Baby Cry Detection

- Developed an AI-based system that analyzes baby cry audio signals to detect emotional states.
- Applied audio processing and deep learning techniques to classify cry patterns.
- Demonstrates real-world application of AI for caregiver assistance.

### Sign Language Detection System

- Built a computer vision model that recognizes hand gestures and converts them into readable text.
- Used OpenCV and MediaPipe for real-time hand landmark detection.
- Improves accessibility for hearing-impaired communication.

### Real-Time Object Detection for Smart Security Surveillance

- Implemented live video object detection using pretrained CNN models.
- Automated monitoring and identification of objects in real-time video streams.
- Useful for smart security and surveillance applications.

### Integrated Patient Care Management Platform

- Developed a full-stack healthcare system to manage patient records, appointments, and data.
- Designed database integration and user interface for efficient data handling.

### Biometric Data Privacy Vault

- Created a secure system for storing biometric information with encryption techniques.
- Focused on privacy protection and secure authentication mechanisms.

## House Price Analysis

- Performed data analysis and regression modeling to predict housing prices.
- Used Python libraries such as Pandas and Scikit-learn for insights.

## Interactive Map for Local Services (Team Project)

- Built an interactive map interface to locate nearby services using web technologies.
- Demonstrated collaborative development and UI design.

# PROFESSIONAL EXPERIENCE

---

## Academic Project Developer

### Self-Directed / University Coursework | 2024 – Present

- Designed and developed 6+ AI, ML, and full-stack applications including Emotion-Aware Voice Analysis, Sign Language Detection, and Smart Surveillance systems.
- Applied machine learning, computer vision, and data analysis techniques to address real-world problems.
- Used GitHub for version control, documentation, and collaborative development workflows.
- Built end-to-end solutions covering data preprocessing, model training, evaluation, and basic deployment interfaces.

# ACHIEVEMENTS

---

- **Top 10 Finalist**, *Hack2Skill TechSprint Hackathon* conducted by Google Developer Communities.
- **Participant**, *OpenSourceX-2025 Hackathon* organized by KL University and sponsored by Red Hat.
- Completed multiple industry-oriented virtual internships in **AI/ML and Full Stack Development**, demonstrating hands-on technical experience.

# CERTIFICATIONS

---

- AWS Machine Learning Foundations
- AWS Generative AI Foundations
- AI/ML Virtual Internship — EduSkills
- Automation Anywhere – Advanced Automation Professional
- ReactJS — Infosys Springboard
- Introduction to Git and GitHub — Coursera
- Java Full Stack Developer Virtual Internship — EduSkills
- Cambridge Linguaskills Certification
